

# 9TH LIVE IN-WOODS SHOW

SEPTEMBER 21-23, 2023

Weyerhaeuser Vail Tree Farm, Rainier, Washington

For over a century, the Pacific Logging Congress has been dedicated to providing sound, technical education about the forest industry to educators, students, politicians, and the communities where its members do business. In addition to its annual conferences, every four years the PLC presents a Live In-Woods Show, welcoming thousands of people, with a special invitation to students and teachers.

This year we will be holding the 9th Live In-Woods Show at Weyerhaeuser's Vail Tree Farm. Cutting-edge equipment will be demoing for three days, giving the community a look at how we sustainably harvest timber and teach our youth firsthand the science of modern forest management.

This year you can help us provide this vital education and, at the same time, get your equipment in front of attendees. On the back is a summary of ways you can help us with our mission. Together we can create a conference with a wide and lasting impact!
